

Abstract submission (deadline August 1st, 2023)

Would you like some interdisciplinary help with an interesting or complex case? Please send an abstract (up to 300 words) follow the Background - Purpose - Methods or Case Presentation - Results - Conclusion to:

KUM.Kinderchirurgie@med.uni-muenchen.de

by August 1st, 2023. We would also be interested in hearing about clinical and experimental studies you are conducting, as well as novel and innovative techniques on aspects of the foregut. There will be poster prizes for the best 3 posters!

PAAFIS e.V. General Assembly

PAAFIS e.V. annual general assembly meeting on Friday, September 15th 2023 at 6pm (members only)

For more information on PAAFIS e.V. and how to join, please visit www.paafis.org

Faculty - PAAFIS 2023

Andreas Lindner	Pediatric surgical sim lab	LMU Medical Center, Munich
Gürsu Kiyani	Pediatric Thoracic Surgery	Marmara University, Istanbul
Oliver Muensterer	Pediatric Surgery	LMU Medical Center, Munich
Hans Hoffmann	Thoracic Surgery	Technical University, Munich

9th International PAAFIS Symposium

Munich, September 14th + 15th 2023

AH-2023_060

Endorsed by

Timetable

	Thursday, 14 September	Friday, 15 September	Saturday, 16 September
Morning 9:00-13:00	Hands-on-course and simulation workshop	Session 3 Session 4	Social event: Fun at the Oktoberfest with your PAAFIS friends (optional)
Afternoon 14:00-18:00	Session 1 Session 2	Session 5 Session 6	

Background and History of PAAFIS

PAAFIS e.V. (Pediatric, Adolescent and Adult Foregut Interdisciplinary Society) started as a concept in 2012 when a pediatric gastroenterologist and surgeon were discussing medically complex patient. It was at that moment that we realized how often we were lacking an adequate and timely input from various specialties for challenging cases. We decided to create a forum that would include physicians, surgeons, therapists, nursing, allied health care workers, as well as patients and patient representatives all working together on foregut and aerodigestive issues.

Learning objectives

This year we are introducing a new update session at PAAFIS 2023, in which the newest science and developments on gastroesophageal reflux, esophageal atresia, biliopancreatic disease, and Helicobacter pylori infection are presented. The main topics will be biliopancreatic disease, metabolic and bariatric interventions, interdisciplinary care and transition, dysphagia, as well as neoplasms of the foregut. We also have a session dedicated to complications and you will be able to bring your own interesting cases to be discussed together with our experts. And of course we will also feature our legendary upfront hands-on-workshop where participants can sharpen their practical skills.

Venue

The Dr. von Hauner children's hospital, at 177 years the oldest academic pediatric hospital in Germany, is located in the city center of Munich, about 1km south of the central rail station and right at the Goetheplatz, which is also the closest subway station. The address is Lindwurmstrasse 4, 80337 Munich, Germany.

Accommodations

Many hotels are located around the children's hospital. Make sure to register and book your accommodation early to avoid higher prices, since Oktoberfest starts on 16 September 2023 and Munich is crowded during that time.

Registration fees

- Participation in the Hands-on-Course is 50 Euros, 40 Euros for PAAFIS members.
- Registration for the Symposium is 135 Euros, 100 Euros for PAAFIS members.
- Online participation costs 35 Euros, 10 Euros for PAAFIS members.
- Trainees, therapists, nursing and patient representatives, please deduct 10 Euros off total price.
- Early bird special: Please deduct 15 Euros off total price for registration before 1 April 2023.
- Yearly membership in PAAFIS is 20 Euros, but must be paid for the year at time of registration.
- This is a EUPSA endorsed course. EUPSA Members, please apply an additional 10% discount!

Information and registration

For more information and registration, please visit our PAAFIS website at www.paafis.org and contact us at kinderchirurgie@med.uni-muenchen.de. To register, please copy-paste and email the following form to KUM.Kinderchirurgie@med.uni-muenchen.de or cut out and send to:

Contact

Prof. Oliver Muensterer
Department of Pediatric Surgery
Dr. von Hauner Children's Hospital, LMU Medical Center
Lindwurmstrasse 4, 80337 Munich, Germany

Please write the phrase "PAAFIS 2023" and your name into accompanying text of the bank transfer of funds or send us a check. In select cases, if you cannot send us a bank transfer or check, we can also take cash at the registration booth.

Program

Thursday morning:

Hands-on-Workshop and simulation lab (Andy Lindner)

- SuSiPed 1.0 - Basic laparoscopic skills
- SuSiPed 2.0 - Advanced laparoscopic skills
- Robotic surgery on the simulator
- Esophagogastrosocopy
- Bronchoscopy
- pH-Probe, Manometry, Impedance and their interpretation

Thursday afternoon:

Session 1: Updates - what is new in these key fields over the last year or two?

- Gastroesophageal Reflux - *Gürsu Kiyan*
- Tracheal surgery - *Hans Hoffmann*
- Choledochal cyst - *Amine Ksia*
- Allergic conditions of the foregut - *Tom Ciecieręga*
- Vascular compression: MAL, SMA Syndrome - *Maeve O'Neill Trudeau*

Session 2: Metabolic and bariatric interventions in children, adolescents and adults

- Childhood obesity: Psychological issues - *Johanna Schubert und Team*
- Obesity comorbidities: Cardiac, Pulmonary, Endocrine, Metabolic, Musculoskeletal - *Susanne Bechtold-Dalla Pozza*
- Pharmacologic management - *Mutaz Sultan*
- Interventional management (sleeve gastrectomy, endoscopic sleeve gastropasty) - *Danielle Wendling-Keim, Eberhard Lurz*

Friday morning:

Session 3: Esophageal Atresia

- Telemedical interdisciplinary care for patients with esophageal atresia (TIC-PEA) - *Maria-Christina Stefanescu*
- Lengthening techniques versus gastric interposition for long-gap esophageal atresia - *Oliver Muensterer*
- Colonic interposition - *Tutku Soyer*
- Stricture management - *Oliver Muensterer*

Session 4: Interdisciplinary care and transition

- Patient perspectives: What do we want when we grow up? *Graham Slater, Anke Widenmann-Grolig*
- Multidisciplinary care of complex foregut and aerodigestive issues - *Oliver Muensterer*
- Telemedical options and networks - *Jan Gödeke*
- Weaning children off feeding tubes - *Lilli Beckenbach*
- Nursing, therapists, social worker, and physician communication and collaboration - *Eva Rost and nursing team, Dr. von Hauner Children's Hospital*

Friday afternoon:

Session 5: Neoplasms of the foregut

- Lumps, bumps and cysts associated with the foregut (thyroglossal duct cyst, brachial cleft remnants, foregut duplication cysts, ranula, salivary gland, and more) *Anne-Sophie Holler*
- Pleuropulmonary blastoma and the possible association with CPAMs, other lung tumors - *Irene Schmid*
- Cholangiocarcinoma and the possible association with Choledochal cysts - *Cigdem Ulukaya*
- Carcinoid and other neuroendocrine tumors of the foregut *Beate Häberle*
- Gastroesophageal Reflux, caustic ingestions, Barrett's and the risk of later carcinoma - *Mutaz Sultan*
- Management of Polyps and the risk of future malignancy *Tom Ciecieręga*

Session 6: Dysphagia

- Assessment and management of anatomical causes of dysphagia in children - *Tutku Soyer*
- Dysphagia and other upper GI Problems associated with Crohn disease - *Tobias Schwerd*
- Neurologic and psychological reasons for dysphagia *Lena Kues*
- Therapeutic approaches to dysphagia within pediatric feeding disorders - *Sandra Bergmann*
- Dysphagia from a pediatric palliative care perspective *Edda Bischoffshausen*
